Deadline today for AGM Seminar

A reminder that today is the deadline for registrations for the ICOMOS NZ Seminar, Seismic Heritage Issues to be held in Wellington on Saturday 29 October.

Registrations need to be with Secretary Mary O’Keeffe by the end of today. Email to: mary.okeeffe@paradise.net.nz

HPT to become ‘Heritage New Zealand’

A bill that improves the governance and operation of the New Zealand Historic Places Trust was introduced to Parliament on 6 October by Arts Culture and Heritage Minister Christopher Finlayson.

The bill will replace Historic Places Act 1993 and aims to improve the regulatory framework for archaeological heritage, and improve the balance between heritage interests, private ownership interests and economic development objectives.

The Bill will clarify the purpose of the Trust, by reforming its governance arrangements, focusing the organisation on its regulatory functions and re-naming it Heritage New Zealand Pouhere Taonga.

Among the changes proposed for the archaeological consenting process, maximum timeframes to process consents will be reduced, aligning them with relevant timeframes for progressing resource consents under the Resource Management Act and a simplified application process introduced for proposals that have only a minor effect on archaeology.

A separate emergency authority process, which was agreed following the September 2010 Canterbury earthquake will apply in the event of natural disasters that cause, or are likely to cause, loss of life, injury or serious damage to property, and will significantly reduce the time limit on application turnaround.

The Māori Heritage Council remains in place as part of the governance structure of Heritage New Zealand. Its role has been expanded, and it will now be consulted on all applications to modify archaeological sites that are of interest to Māori.

The full text of the Bill can be found online, click here.
Teetering Stone Chamber in Durham St.

Board Talk
Heritage @ Risk

naturally much discussion at the August Board meeting centred on the condition of significant heritage buildings 'stranded' in the Red Zone of Christchurch, where CERA considers intervention is too risky because of the threat from looming unstable tower blocks, or where it is currently impossible for contractors to obtain insurance to undertake urgent protective work on damaged buildings. The Canterbury Provincial Buildings are a case in point where parts of the complex have been open to the sky since the February quake and more recently have endured two snowfalls.

The Board has written to the PM outlining the complex’s special significance as the sole surviving purpose-built Provincial government buildings in New Zealand and the first historic buildings ever to gain protection by the New Zealand Government. It has sought urgent intervention to ensure that these most significant buildings receive the essential protection they deserve.

To date, the issue has been bouncing off the walls of the ministers for Conservation, Arts and Culture and Canterbury Earthquake Recovery, but we hear from Christchurch that preliminary work has started on the stone chamber.

The Provincial Buildings on Durham St and the former Municipal Chambers on Worcester St will feature shortly on new ICOMOS NZ website pages featuring buildings of special interest at risk and requiring urgent attention. Other international heritage at risk including New Zealand’s can be downloaded at http://www.international.icomos.org/risk/world_report/2008-2010/H@R_2008-2010_final.pdf

Ethical renewal

The ICOMOS NZ Board has now made adoption of the ICOMOS Ethical Commitment Statement part of the annual subscription renewal process and all members of ICOMOS NZ will now be asked to affirm their intention to work within the Statement when they renew their membership later this year. This change will correct an anomaly where members who joined in the early days of ICOMOS NZ have not affirmed the Ethical Commitment Statement.

Currently new members of ICOMOS NZ sign a Statement of Commitment on the membership application form accepting that membership of ICOMOS New Zealand is contingent on their conservation activities continuing to fall within the ambit of the ICOMOS New Zealand Charter, ICOMOS NZ Code of Ethics and the

Use of Post nominals

The introduction of the ICOMOS Ethical Commitment Statement has made it possible for Individual or Young Professional members, who are financial members of ICOMOS, to use the post-nominal “M. ICOMOS” to indicate their ICOMOS membership and recognise the professional nature of the organisation. This right extends only to members who continue to practice according to the ICOMOS New Zealand Charter, ICOMOS NZ Code of Ethics and the
Consequential changes have now been approved to the ICOMOS NZ Code of Ethics to align ICOMOS NZ’s practices with the ICOMOS Ethical Commitment Statement regarding membership qualification criteria and also the use of post nominals.

**Membership qualifications**

Membership criteria derive from the Rules via the Statutes of ICOMOS and rely on a degree of interpretation based on the applicant’s education, training and professional experience.

It is now generally required across ICOMOS that applicants for Individual Membership will have attained appropriate professional qualifications and a minimum of three years appropriate experience in practical work and policy development in that field. ICOMOS NZ has adopted this test as an underpinning requirement for Individual Membership.

**Education & Training Info for website**

Information on education and training for ICOMOS members will be regularly updated on the ICOMOS NZ website. Members of the education and training subcommittee Rebecca Hartfield, Heike Lutz, and Bruce Petry have completed compiling information on a range of appropriate conservation education and training opportunities involving postgraduate courses overseas, and short courses both in New Zealand and further afield.

The course information is tabulated on page 4 of this issue and will be uploaded to the ICOMOS NZ website shortly.

If you have recently undertaken training and are in a position to recommend the course to others interested in taking it, or if you are aware of new courses becoming available please e-mail details to bruce.petry@salmonreed.co.nz

---

**Canterbury Provincial Buildings Make WMF Watch Site**

Since 1965 the World Monuments Fund, an independent organization dedicated to saving the world’s most treasured places, has been highlighting places at severe risk as well as facilitating the preservation of important architectural and cultural heritage sites around the world with expert assistance.

This month, the Canterbury Provincial Buildings were added to the Watch Site noting “The repair, reconstruction, and seismic strengthening of the buildings would support heritage recovery efforts in Christchurch and open opportunities to advance the knowledge of seismic protection of unreinforced masonry buildings, as well as encourage other rehabilitation projects in the province.”

You can check out the 2012 World Monuments Watch site at http://www.wmf.org/watch and download the Provincial Buildings Watch poster at http://www.wmf.org/content/2012-watch-posters

**Pushing the envelope**

The latest, albeit temporary enhancement of Auckland Council’s Conservation Area F – Burmley Terrace in Sandingham where Tevita Liliate speedily repainted his bay villa in time for the Tonga vs. All Blacks game.

Burmley Terrace is listed in the Isthmus Plan as “an outstanding heritage area of quite remarkable consistency, with a superb range of finely closely spaced Late Victorian and Edwardian bay villas...”
ICOMOS NZ aims to assist potential and current heritage professionals to select the most appropriate heritage education and training.

In 1993, the ICOMOS General Assembly adopted guidelines http://www.icomos.org/docs/guidelines_for_education.html to promote the establishment of standards for education and training in the conservation of monuments, groups of buildings and sites, including historic buildings, historic areas and towns, archaeological sites, and their contents, as well as historic and cultural landscapes. Please note that these guidelines are currently being updated.

Opportunities for professional heritage and trades education and training in Australia and New Zealand have recently been reviewed on behalf of the Heritage Chairs and Officials of Australia and New Zealand (HCOANZ http://www.heritageinfo.gov.au/hcoanz.html).

These findings reinforce the long held consensus among ICOMOS NZ members that there is a need for both a greater number of qualified heritage practitioners and further training for those already involved in cultural heritage conservation in NZ.

<td>For Architects, Surveyors and anyone actively employed in building conservation</td>
<td>The object of the course is to illustrate by lectures and practical examples the manner in which the conservative repair of old buildings can be achieved. The methods demonstrated include those evolved and proved by the Society over almost 130 years. The lecturers are all practising architects or other experts with long experience of this type of work.</td>

<td>UK (Scotland)</td>
<td>Historic Scotland</td>
<td>2 years</td>
<td>Research fellowship</td>
<td>Fellows will be dictated on a project by project basis but they are likely to have some experience of research at postgraduate level. Interns will have some specialist knowledge appropriate to the discipline on which to conduct an active piece of research. Studentships will also require appropriate discipline - specific learning.</td>
<td>Research fellowships are aimed at undertaking research projects in a mentored situation to provide a beneficial learning experience, whilst undertaking work which is in itself valuable to the built heritage. The Fellow will normally be awarded a grant to undertake a specific task or subset of tasks against a common theme. Research Internships/Studentships These studentships are mentored by the Technical Conservation Group Conservation Centre in the specialist conservation field, focusing on stone, paint and in the preventative conservation – science fields, often with an external academic partner.</td>

Visitors to the cloisters of St. Trophime in Arles, are often struck by the clammy deposits of hand grease left behind on the stonework by countless visitors to this World Heritage Site. Recent work funded by the World Monuments Fund is cleaning the complex.

The Church of St. Trophime is one of the most studied Romanesque structures and yet many mysteries remain about the 12th century complex and its sculpture. Arles was an important city as early as the Roman period in France and had strong connections to significant events in the spread of Christianity. Art historians have written widely about the iconography of the sculpture, and its inscription in 1981 as a World Heritage Site recognized its contributions to our understanding of Romanesque art and architecture.

In the late 1980s and early 1990s, World Monuments Fund contributed to the planning of a conservation project for the façade of St. Trophime, which led to an invitation to work with the City of Arles on the conservation of its renowned cloister.

WMF first approached the conservation of the cloister by analyzing the columns and capitals that form the cloister to determine the best methods for cleaning, repairing, and maintaining the structure. In 2008, Laboratoire d’Études et de Recherche sur les Matériaux completed an extensive survey to determine the original colours of the stones in the cloister, their chemical composition, and the ways in which the aging of the stones affects the patina seen today. Foundation for Research and Technology-Hellas carried out testing to determine if the sculpture of the capitals atop the columns can be cleaned with either UV or infrared laser technology.

WMF has also partnered with CyArk to create laser scans of the cloister that will enable WMF to describe the conservation program through presentation of Web-based 3-D models in combination with drawings, high-resolution photography, and narrative descriptions of treatments employed. In 2011, following the completion of the scientific study and documentation work, the conservation of the cloister began.

A Partnership at Stowe

Stowe House was originally the country seat of the Temple-Grenville family. The first house on its footprint was built between 1677 and 1683 for the third baronet, Sir Richard Temple. Over the next century, the family significantly altered and enlarged both the house and its elaborately designed gardens. Stowe was shaped by a parade of famed British architects including John Vanbrugh, James Gibbs, Robert Adam, and John Soane.

Meanwhile, well-known landscape designers William Kent and Capability Brown transformed the grounds into Britain’s finest Arcadian garden, with around 50 buildings, an ensemble admired and imitated by many. The family built a magnificent art collection, and displayed it in continually updated and improved interiors, remodelled by European designers such as Giovanni Battista Borra, Georges-François Blondel, and Vincenzo Valdre.

A combination of increasing expenditure and decreasing responsibility eventually bankrupted the family, and in 1827 the first Duke of Buckingham and Chandos, great-great-grandson of Sir Richard Temple, closed Stowe House and took to a yacht on the Mediterranean, over a million pounds in debt.

The family tried to stay afloat by selling off much of their art through a major auction in 1848, but to little avail. The last time Stowe came to the auction block was in 1922, when it was saved from almost certain demolition and transformed into Stowe School, which opened in May 1923.

The Stowe House Preservation Trust (SHPT) was formed over a decade ago with the aim of restoring and preserving the house. The trust has had enormous success in repairing
and conserving the façades and roofs, while the National Trust has a 20 year record of restoring the landscape gardens, its temples and follies. Part of the SHPT's initial response to Stowe's poor condition was its successful nomination to the 2002 WMF Watch, whereupon it received a WMF grant with matched funding for the restoration of the oval-domed Marble Saloon. This project, set at the heart of the mansion, was completed in 2005 and demonstrated the potential transformation of this magnificent building.

However, much still needs to be done to the mansion to secure its masonry, structural carpentry, plaster and painting, and to create a major public interpretation facility.

Through WMF’s partnership with an anonymous benefactor, the decaying library roof is now in the process of complete replacement, and the plaster of its fine ceiling is being restored.

In addition, the crumbling masonry of the south front will be repaired by 2011, as will the roofs of the pavilions. The interiors will be repaired and cleaned and the whole house illuminated by a major new interpretive facility with a commitment to public engagement.

Fletcher Building donates $1 million to preserve historic Christchurch building facade

Auckland, 18 October 2011

Fletcher Building Limited today announced it has committed $1 million to preserving Christchurch’s McKenzie and Willis building facade. The donation is part of the $6 million pledged by the company towards the region’s earthquake recovery and reconstruction efforts.

The three-storeyed Edwardian style building on the corner of High and Tuam Streets was severely damaged after the earthquakes in February and June. Building assessments have deemed it too unsafe to retain, although engineers recommend the facade be saved due to its significant heritage value.

Chief Executive Jonathan Ling said “Christchurch has tragically lost many of its historic buildings over the past year, which makes it all the more important to retain those buildings that can be salvaged. We’re therefore delighted to be able to assist in preserving the facade of 179 High Street and ensure it continues to be a feature of the central city streetscape”.

The donation is being managed through the Canterbury Earthquake Heritage Buildings Fund. Chair Anna Crighton said “The gesture of Fletcher Building to grant $1 million towards the retention of the McKenzie and Willis heritage facade is extraordinarily special. It encourages and promotes the retention of a small precinct of other heritage facades in the High Street area and provides a visual reminder of some of our historic streetscapes and of the city’s glorious past.”

The McKenzie and Willis building joins the Excelsior Hotel, Victoria Black and Alice in Videoland (the old Post Office) on the growing list of buildings in the High Street area that are to be retained.
Viewpoints

"I wonder what other changes have been made to Christchurch City Planning documents to remove references to the inconvenient truth that it has always been an earthquake prone city, ignoring the "build to the conditions" message that has been consistently delivered by consultants for the past two decades.

"Thinking of heritage buildings, we might consider the potential of a 'picturesque ruin'. What about the Provincial Chambers? It was a wonderful building in a wonderful location, but is attempting to repair or restore it after such a catastrophic failure inappropriate and even vulgar?

The ruined stone portion might be retained, stabilized and made safe, but then left empty, with seating for people with wild flowers growing, a memorial experience that could help explain the earthquake to our children and grandchildren for years to come:

"A lot of buildings slated for demolition should be considered for repairs and strengthening, particularly heritage buildings," Miyamoto says. "No more than 10 per cent of buildings in the CBD should come down. To be saying 50 per cent should go in Christchurch - that's 1200 out of 2400 buildings - is unbelievable. I don't understand why this should be. In general your building stock has stood up very well in comparison with other cities and you have good codes and excellent engineers.

"Spotted in Papanui Road, Christchurch. Chim Lite's answer to the toppling stack - a light weight replica in Color-Cote steel described by the manufacturer as "an approved solution by EQR Fletchers [sic] for replacing chimneys in Canterbury."

"I'll kiss it better"
Below is a list, submitted by members of US/ICOMOS, Australia ICOMOS and other ICOMOS National Committees, of sites and museums that rewarded the ICOMOS card holder with free or discounted entry.

Please note that, while ICOMOS NZ cannot guarantee these sites/museums will honour the card, members have reported success gaining entry with the card in the past. We would ask you to contact the Secretariat with any additions to or comments on this list.

**Austria**
- Stefanstdom, Vienna
- Albertina Museum, Vienna
- Lichtenstein Palace Museum, Vienna
- Belvedere Museum, Vienna
  (Not – Fortress, Salzburg)

**Belgium**
- Most historic places recognize the card

**Czech Republic**
- National Gallery, Prague
- Prague Castle, Prague
- Spanish Synagogue (part of Prague Jewish Museum), Prague

**Denmark**
- Free entry to most World Heritage places

**Finland**
- Numerous general museums and cultural heritage sites [reported by ICOMOS Finland]

**France**
- Free entry to all national museums/galleries (Musées Nationaux du Ministère de la Culture), including the Musée D’Orsay, Musée du Louvre, Château de Blois, Château de Chambord, Palais de Versailles, and Palais de Fontainebleau and all departmental and city museums. (It also gets free entry to the temporary / blockbuster exhibitions in these institutions.)
- An ICOMOS member can go straight through entries reserved for ticket holders without lining up (e.g., in the Louvre, Musee d’Orsay, etc and for the blockbusters). In cases where staff do not recognize the card explain that ICOMOS is affiliated with ICOM and that there is an arrangement for the same concessions as ICOM members.
  - There is also very frequent acceptance of the card at almost all historic monuments and cultural institutions, including in Paris.

**Germany**
- Bauhaus Archiv, Berlin
- Potsdam World Heritage Site, including Sanssouci park, Neuer Garten, Babelsberg and Glienicke with their palaces, Berlin-Brandenenburg
- Pillnitz Palace, Dresden

**Greece**
- National Archaeological Museum, Athens and archaeological sites, including the Acropolis, Delphi, Mycenae, Olympia, Ancient Corinth, and Epidaurus
- All cultural sites in Athens

**Netherlands**
- Van Gogh Museum
- Museum Het Schip (Amsterdam School)
- Anne Frank House, Amsterdam

**Hungary**
- St. Mathias Cathedral, Budapest

**Italy**
- Uffizi gallery, Florence
- Coliseum, Rome
- Most cultural sites in Rome
- Majority of sites run by the Italian Ministry of Culture, including national galleries and museums

**United Kingdom**
- Tate Modern, Tate Britain, London
- Imperial War Museum (all sites – Duxford, HMS Belfast, Cabinet War Rooms, IWM London, IWM North)
- National galleries and museums, including special exhibitions at the Royal Academy of Art and the British Museum
- Some sites managed by English Heritage but not Historic Scotland properties.

**Poland**
- The Royal Palace, Warsaw
- Most heritage places and museums

**Portugal**
- The Castelo Sao Jorge, Lisbon (ICOMOS free entry is printed on the notice at the ticket counter)
- Gulbenkian museum, Lisbon
- Free entry to World Heritage sites, Belem
- Free entry to all World Heritage places, all state-managed palaces, villas and gardens, Sintra

**Spain**
- The Royal Sites, including El Escorial and Aranjuez
- ICOMOS Spain reports that presenting the card works at numerous other sites and museums

**Turkey**
- Hagia Sophia, Istanbul
- Topkapi Museum, Istanbul
- Istanbul Archaeological Museum, including the Archaeological Museum (main building), Museum of the Ancient Orient and the Museum of Islamic Art (tiled Kiosk)

**Iran**
- Numerous museums, sites and monuments (reported by ICOMOS Iran)

**New Zealand**
- Waitangi National Trust

Dredge your archives for the extraordinary, exotic, and bizarre (with a vaguely heritage flavour) and rush them to David Reynolds, at reynolds@ihug.co.nz
**Gaddafi’s legacy**

Martin Jones supplies some uplifting stuff from David Smith writing in The Guardian from Tripoli last week on the subject of Muammar Gaddafi’s approach to a collection policy for the Libya National Museum. Says Smith “... he made sure visitors were left in no doubt that the flowering of Roman, Byzantine and Islamic cultures were mere historical footnotes to his own ascent as "king of kings"...” "Brushing aside curators' preference for classical antiquity, Libya’s leader gave pride of place in the first gallery to the Volkswagen Beetle he drove in the sixties and the open-top Jeep that swept him to power in 1969. Both have been vandalised and their future is uncertain in a post-Gaddafi Libya, where his ubiquitous image has been furiously purged from everything but banknotes."

Staff in the museum managed to deter invading rebels from completely destroying items relating to Gaddafi noting that "Staff never wanted to display the cars but we could not refuse..." "We don't consider them part of the classical collection. In the future, however, we will expose them to the public because they are part of our history."

The museum, described by Smith as “one of world culture’s best-kept secrets, with a stupendous collection of antiquities” escaped lightly, compared with its museums in Baghdad and Cairo. Staff plan to hold Gaddafi collection for a future transfer to a future museum of modern history.

**Vunet’s arcs offend**

Sherry Reynolds sends news from Rodney Jensen, an Australian associate member of the International Scientific Committee on Cultural Tourism (ICTC) who draws our attention to the recent placement of contemporary sculptures by Benar Vunet in highly visible & important view lines of the grounds of Versailles. He finds this a strange decision feels that if ICOMOS is of relevance to the professional conservation and design community it must have a position on this matter.

Sculptor Benar Vunet’s response: “Versailles, as I see it, is all about wide open spaces and perspectives that stretch as far as the eye can see. It is the perfect venue for my sculptures – and a real challenge to take on such a sublime, grandiose milieu. My Arcs have to blend in without fading away in the backdrop. So I have to accommodate several variables. That was why I decided to tailor new sculptures to the area's topology and scale.”

**No rest for the travellers?**

Meanwhile across the channel, Rebecca Harfield advises English Heritage has completed its deliberations on an application from the 1000+ inhabitants of Dale Farm, the UK’s largest Irish traveller halting site located in Cray’s Hill, Essex, to give protection status to the scaffolding gateway at the entrance to their site.

The gateway to the site near Basildon, is adorned with posters and banners, and has become an ‘emblem of the struggle for travellers' rights’, according to the applicants. The structure has been in place at the former scrap yard for five years...
and acts as part of the defence against bailiffs, a Dale Farm Solidarity spokesman said.

Resident Kathleen McCarthy said: 'We're here to fight for our rights to a normal family life, for our children to get an education and for us to have security for our homes. 'The tower is all that stands between ourselves and the bailiffs.'

However in a media release last week English Heritage declined the application saying "The Department for Culture, Media and Sport makes the decisions on listing and has agreed with our recommendation not to list the barricades at Dale Farm. The barricades at Dale Farm do not begin to have the high architectural interest essential to meet the criteria for listing on architectural grounds. In historic terms, the current case is just too recent for historic importance to be a relevant factor."

Marketing images for the Queen's Lane redevelopment of the former Mayfair Building in upper Queen Street appeared last week minus the 1868 Queen's Head Tavern façade, dubbed by the Herald's Brian Rudman as 'a Queen Street horror too awful to destroy'. Developers propose to replace the controversial pastiche with something about as exciting as a party hat.

Said Rudman "But there's surely a case for arguing this ruin is such a stand-out exemplar of facadism that it deserves to be preserved, not just as a warning to younger generations but also as a lasting embarrassment to those responsible."

The façade is still registered Category 2 by the NZHPT which could seek a notified hearing before the Auckland Council.

Meanwhile further down Queen Street, Leonard Terry's 1867 façade of the Bank Of New Zealand, the first significant building subject to facadomy in Auckland is set to become the gateway to Foodstuff's New World Metro supermarket.

Off with her head?

While Auckland was allegedly once the capital of facadism, and it is true that at least one façade has recently been glued on to a new building in Pitt Street, the city looks set to reduce its score by removing its second most controversial, and possibly the silliest example of what one Auckland heritage hero once dubbed “a venereal disease”.

Whangarei Rules OK?

If you blink you might miss this entreatment for a quiet earth when you flash past the Central Baptist Church just north of Whangarei's CBD hamburger belt.

Canterbury Icomites will no doubt appreciate that there are others out there on their knees praying for them other than the Minister for Earthquake Recovery.

Whangarei leads the way in so many ways it's kind of spooky. If you recall the recycled KFC in the last News, which is just up the road from this church, you'll be interested to know that in the intervening months the Pizza Hut just down the road - one of 'Post-Jetsons' styled things has finally closed its doors and awaits a sensitive (we hope) new use.

Given this may be the start of a national movement to re-style the aged huts there must be heaps more lurking in other centres in a moribund or curiously adapted state.

There will therefore be a special surprise prize for the funkiest image of a recycled (or decaying) fast food shack received by the editor by 1 December 2011.
Documenting the damage

Thanks to NZHPT’s Dave Margetts we get a closer look at heritage in the red zone. For the past few months Dave has been working as a member of the team assessing damage to Christchurch’s historic Buildings.

Damage to the Timber Chamber, the first part of the Canterbury Provincial Buildings, completed in 1859.

The enterprising M.R. Mulgrew takes a swing at his insurers.
Above: View from inside the dome drum of the Cathedral of the Blessed Sacrament.

Left: A digger finishes off the circa 1881 Category 1 Guthrey Centre, formerly Anderson’s Foundry Office, one of the few remaining William Armson-designed buildings that remained in Christchurch prior to the February quake.
